Reviewer’s report

Title: The global prevalence of postpartum psychosis: a systematic review

Version: 0 Date: 16 Apr 2017

Reviewer: Alexia Koukopoulos

Reviewer's report:

I thank the editor for sending this interesting paper to review. I believe it addresses a very important topic for women's mental health. The conclusions seem to confirm the previously known low incidence of postpartum psychosis in recent literature. Only six studies met the study criteria which confirms the lack of large scale studies world wide and the need to pay further attention to screening, diagnosing and treating puerperal psychosis world wide. I think this paper should be accepted for publication.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
