1) The paper should be carefully re-read for typo and language style. Non-exhaustive examples:

- page 4, lines 15 to 19: the sentence should be rephrased.

- page 6 line 13: envelop should be envelope (noun).

- Page 9 lines 1 to 3: the sentence should be rephrased.

- Page 9 lines 7 to 10: the sentence should be rephrased. For example, after "showed", the comma should be replaced by 'that' and "where" is not appropriate.

2) I don't see any change in table 3

3) page 11-12: The fact that energy levels are decided according to individual seizure thresholds which varied from person to person should be explained explicitly in the method rather than in the discussion.
