Reviewer's report

Title: The Japanese Version of the Questionnaire about the Process of Recovery: Development and Validity and Reliability Testing

Version: 1 Date: 29 Aug 2017

Reviewer: Noureddin Nakhostin Ansari

Reviewer's report:

Thank you for revising the manuscript. There are still some shortcomings in the text that should be addressed.

1- Page 12, Discussion, line 16-20 is repetition with line 3-8 and should be omitted.

2- Page 8, please report the number of subjects who participated in test-retest reliability phase of the study.

3-Discussion still needs work and should be expanded to cover the all aspects of the measurements in the context of the previous investigations performed in this area such as convergent validity, internal consistency reliability, test-retest reliability, in depth discussion on factor structure. I would like to see other limitations of the study that should be suggested for future works

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
Quality of written English
Please indicate the quality of language in the manuscript:
