Reviewer’s report

Title: Hypocholesterolemia is an independent risk factor for depression disorder and suicide attempt in Northern Mexican population

Version: 0 Date: 19 Jul 2017

Reviewer: Helen Daniels

Reviewer’s report:

I enjoyed reading your paper. Although I'm not overly familiar with biochemistry I was able to follow the rationale and the discussion very clearly. You were very open about your limitations which I appreciate. This is an interesting study and I would like to see similar studies repeated with different populations in future literature as repetition of your results could have a significant impact for public health attempts to reduce suicide risk. I wish you all the best for future studies.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I recommend additional statistical review
