Reviewer’s report

Title: Prevalence of positive depression screen among post miscarriage women. A cross sectional Study.

Version: 1 Date: 08 Nov 2017

Reviewer: Sakineh Mohammad-Alizadeh

Reviewer's report:

It is a useful study. However, I think the manuscript presents too limited information to the readers. The sample size seems small. It is calculated using d=0.05. Most references recommend considering d≤20%*p (in this case ≤0.026). I suggest continuing the study (increasing sample size to about 300) and also examining and presenting risk factors of the positive depression screen using bivariate and multivariate analysis.

Also, the manuscript needs major revision. There are many parts, especially in methods and result section which are repetitive. Discussion are not enough strong and some parts are not based on the results.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

No

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
**Quality of written English**
Please indicate the quality of language in the manuscript:

Needs some language corrections before being published

**Declaration of competing interests**
Please complete a declaration of competing interests, considering the following questions:

1. Have you in the past five years received reimbursements, fees, funding, or salary from an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

2. Do you hold any stocks or shares in an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

3. Do you hold or are you currently applying for any patents relating to the content of the manuscript?

4. Have you received reimbursements, fees, funding, or salary from an organization that holds or has applied for patents relating to the content of the manuscript?

5. Do you have any other financial competing interests?

6. Do you have any non-financial competing interests in relation to this paper?

If you can answer no to all of the above, write 'I declare that I have no competing interests' below. If your reply is yes to any, please give details below.

I declare that I have no competing interests.
