Reviewer’s report

Title: Euthanasia and physician-assisted suicide in patients suffering from psychiatric disorders: A cross-sectional study exploring the experiences of Dutch psychiatrists.

Version: 2 Date: 09 Jan 2019

Reviewer: Pablo Requena Meana

Reviewer's report:

Lines 108-109: I suggest moving "(n=91)" [unique patients requesting EAS] and "(n=7)" [unique patients receiving EAS] from the analysis to the results section. These two figures are in fact the main results of the study on which the authors will base their estimate for the number of psychiatric patients requesting and receiving EAS and as such should appear in the results section rather than pre-emptively in the analysis section.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
