Reviewer's report

Title: Saccadic eye movements in different dimensions of schizophrenia and in clinical high-risk state for psychosis

Version: 1 Date: 05 Sep 2018

Reviewer: C. Rummel-Kluge

Reviewer's report:

The manuscript is written well and is about a study on an interesting Topic, the saccadic eye movements in different dimensions of schizophrenia and in clinical highrisk state for psychosis.

Overall the study is prescribed well and the manuscript is explaining adequately what the authors were doing.

I have only some minor issues:

Please specify other limitations of the study in more detail and put more emphasis on the conclusions as now these are mainly a summarization of the results. Possible future research ideas could be mentioned as well.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes
Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics

Quality of written English
Please indicate the quality of language in the manuscript:
