Title: Recovery-focused mental health care planning and co-ordination in acute inpatient mental health settings: a cross national comparative mixed methods study

Version: 1 Date: 19 Nov 2018

Reviewer: Ada Hui

Reviewer's report:

Please include all comments for the authors in this box rather than uploading your report as an attachment. Please only upload as attachments annotated versions of manuscripts, graphs, supporting materials or other aspects of your report which cannot be included in a text format. Please overwrite this text when adding your comments to the authors.

This is an interesting paper of contemporary relevance.

It may be helpful to make some minor amendments as follows:

- There is mention of both the CPA in England and CTP in Wales as part of the Background although the comparisons, contrasts and overlaps between these could be made more explicit, particularly for an international audience.

- The study design mentions macro, meso and micro levels of organisation, however, there is little detail on micro level ideas and how these were considered. This would benefit from greater clarity.

- Semi-structured interviews: "key personnel were identified using purposive sampling" - please state specifically who these personnel included, i.e. what their roles were for clarity. Also, please make clear whether the same individuals were involved in multiple stages of data collection.

All in all, a well written paper which will be of interest to a wide-ranging audience.
Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I recommend additional statistical review

Quality of written English
