Title: Reduced mentalizing in patients with bulimia nervosa and features of borderline personality disorder: A case-control study

Version: 2 Date: 07 Feb 2019

Reviewer: Tiffany Brown

Reviewer's report:

The reviewer's have addressed most of my concerns with the original manuscript and I think the revised version is much improved. I have one minor revision prior to recommendation for publication.

In regards to comment #6 (referring to page 6, lines 24-25), the fact that HC status was determined by asking participants if they "had no history of or current eating disorders.." should be added to the limitations section, given that there was no confirmation of the lack of an eating disorder by a structured or unstructured diagnostic interview.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.
