Reviewer’s report

Title: Suicide risk, personality disorder and hospital admission after assessment by psychiatric emergency services

Version: 1  Date: 28 Apr 2019

Reviewer: Naoki Hayashi

Reviewer’s report:

I appreciate much a number of corrections the authors made responding my comments.

Although they have greatly improved legibility and consistency of descriptions in the manuscript, I would like to add two comments on the manuscript.

1) Results subsection in Abstract: Isn’t it necessary to correct the phrase "admission rate 0.28 versus 0.45 respectively" in the first sentence? The same one in Results section of the previous manuscript has been changed on the basis of the third comment of Reviewer 1 in the revised manuscript.

2) Table 2: Though I cannot say firmly whether or not the 95% confidence intervals are to be shown in the table since my specialty is not statistics, I believe these estimates are useful to help the readers grasp what extent of the influence the variables have on the admission decision.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I recommend additional statistical review
