Reviewer’s report

Title: The trajectory of symptom burden in exposed and unexposed survivors of a major avalanche disaster: A 30 year long-term follow-up study

Version: 0 Date: 29 Oct 2018

Reviewer: Reviewer 2

Reviewer’s report:

PEER REVIEWER ASSESSMENTS:

OBJECTIVE - Full research articles: is there a clear objective that addresses a testable research question(s) (brief or other article types: is there a clear objective)?

Yes - there is a clear objective

DESIGN - Is the current approach (including controls and analysis protocols) appropriate for the objective?

No - there are major issues

EXECUTION - Are the experiments and analyses performed with technical rigor to allow confidence in the results?

No - there are major issues

INTERPRETATION - Is the current interpretation/discussion of the results reasonable and not overstated?

No - there are minor issues

OVERALL MANUSCRIPT POTENTIAL - Could an appropriately REVISED version of this work represent a technically sound contribution?

Maybe - with major revisions

PEER REVIEWER COMMENTS:
GENERAL COMMENTS: This study is really interesting and innovative. Ethics approval and consent to participate was obtained. The major limitation is the sample size.

REQUESTED REVISIONS:

The results are based on a longitudinal survey of 21 soldiers which is an extremely small sample. Therefore, the conclusions which can be drawn from the results are highly limited. Moreover, it is to be expected that due to the very small sample size, distribution and estimation problems occur. I strongly suggest using non-parametric statistical tests (e.g., the Wilcoxon-Mann-Whitney instead of T-test). Finally, it is possible that with a larger sample, the differences between the exposed and unexposed groups regarding adjusted PTSS-10, IES-15 or STAI-12 mean scores would become significant. It is very important to provide evidence that the study has sufficient power to detect effects of substantive interest. Therefore, please perform a power analysis for each statistical test.

Were the exposed and the unexposed soldiers part of the same unit or team? Did they know each other before the avalanche disaster? If yes, this may explain why there are no differences: unexposed soldiers could be considered victims (although indirect) too.

Note: This reviewer report can be downloaded - see attached pdf file.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

No

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

No

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

No

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

Declaration of competing interests
Please complete a declaration of competing interests, considering the following questions:

1. Have you in the past five years received reimbursements, fees, funding, or salary from an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

2. Do you hold any stocks or shares in an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

3. Do you hold or are you currently applying for any patents relating to the content of the manuscript?

4. Have you received reimbursements, fees, funding, or salary from an organization that holds or has applied for patents relating to the content of the manuscript?

5. Do you have any other financial competing interests?

6. Do you have any non-financial competing interests in relation to this paper?

If you can answer no to all of the above, write 'I declare that I have no competing interests' below. If your reply is yes to any, please give details below.
