Title: Associations of personality traits with Internet addiction in Chinese medical students: the mediating role of attention-deficit/hyperactivity disorder symptoms

Version: 1 Date: 15 May 2019

Reviewer: Ursula Eleonore Oberst

Reviewer’s report:

The authors have satisfactorily replied to my queries and made changes in their manuscript accordingly. However, their reply to why they investigated overall "Internet addiction" is not entirely convincing; I insist that such a broad approach may diminish the impact and contribution of this study to previous knowledge. Therefore and I strongly suggest the authors do more specific studies in the future.
