Title: An Asian Study on Clinical and Psychological Factors Associated with Personal Recovery in People with Psychosis

Version: 3 Date: 03 Aug 2019

Reviewer: Mona Eklund

Reviewer's report:

Congratulations, I think the authors have done a good job with revising the manuscript. The sentence regarding qol still does not flow very well with the rest, however. Please consider if you think this wording may be clearer:

Nonetheless, Leamy and colleagues [23] reported that 65% of the studies they reviewed had endorsed quality of life as important to the recovery process, categorised under the domain of meaning in life (66% of studies endorsed meaning in life itself). The fact that the QPR-15 showed a moderate correlation with the total WHOQOL-BREF (quality of life) ($r_s = 0.669$) in the current study thus supports its convergent validity with the CHIME domain of meaning in life.
