Reviewer’s report

Title: Prevalence and correlates of suicidal ideation in Korean firefighters: A nationwide study

Version: 0 Date: 20 Aug 2019

Reviewer: Benjamin Vicente

Reviewer's report:

A national study on suicidal ideation among a highly vulnerable work force is in itself of interest.

The state of the art is reasonably well covered.

Regarding method, most of the instrument being used have translation and psychometric properties explicitly described, except for SBQ-R and Beaton et al self report measure of traumatic events. Details would be desirable.

Statistical analyses seems appropriate, as well as discussion and identification of limitations.

English language should be carefully reviewed.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
