Reviewer’s report

Title: Posttraumatic Stress Disorder and Risk of Selected Autoimmune Diseases among US Military Personnel

Version: 0 Date: 12 Jul 2019

Reviewer: Amit Shrira

Reviewer's report:

Overall an interesting study. I think that in view of the extensive literature in the field the introduction can end with specific hypotheses. In the limitation section it should be added that PTSD was assessed by DSM-IV criteria and future studies should establish the association between PTSD with DSM-5 criteria and autoimmune diseases.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
