Reviewer's report

Title: Determinants of Underweight, Stunting and Wasting among Schoolchildren

Version: 9  Date: 12 November 2014

Reviewer: Hannah Wilson

Reviewer's report:

The methods and results of this paper are solid and worthy of publication. While I think the introduction and discussion are the weak parts of this paper, the careful methodologies somewhat overcome these weaknesses. This paper adds to the knowledge of biocultural predictors of nutritional status, which has important health implications.

Before publication, the type of multivariate analysis needs to be clarified in the text.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, and I have assessed the statistics in my report.

Declaration of competing interests:
