Reviewer's report

Title: Effectiveness of a problem-solving based intervention to prolong the working life of ageing workers

Version: 3 Date: 28 December 2014

Reviewer: Sebastien Lamy

Reviewer's report:

In the revised manuscript, the authors took into account each of my suggestions. The revised manuscript is concise and clear, with a better description of the underlying theory. This version of the manuscript describes the tools used in a more comprehensive way. The statistical methods are well described and were appropriate regarding the study aim. I recommend this manuscript for publication without additional revision.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
