Reviewer's report

Title: Sexual Behavior and Vulnerability to HIV Infection among Seasonal Migrant Laborers in Metema District, Northwest Ethiopia: A Cross-Sectional Study

Version: 5 Date: 31 August 2014

Reviewer: Loraine Townsend

Reviewer's report:

I am satisfied that the authors have addressed the comments and concerns in my first review.

1) Minor essential revision: the Background could be better organised as there is a fair amount of repetition in this section.

2) I would strongly recommend a very careful edit of the manuscript. At times the English is quite poor; for example, the section headed "data collection procedures".

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
