Reviewer's report

Title: Age pattern relationship of nutritional status with biological, parasitic, socioeconomic and household factors in northeastern Ethiopia

Version: Date: 8 January 2015

Reviewer: Ma¿gorzata Bednarska

Reviewer's report:

General comments.
This ms presents the interesting findings on the undernutrition and their relationship of biological, socioeconomic, household and parasitic factors in the participants of Ethiopia.

Major comments
The text is clear and easy to follow but in my opinion you should explain more clearly the ‘Piped’- phrase describing source of drinking water. What kind of water is supplied? From which sources this water comes?

Minor comments
Table 1. Please write ‘sociodemographic’ in the title.

Level of interest: An article of importance in its field

Quality of written English: Not suitable for publication unless extensively edited

Statistical review: No, the manuscript does not need to be seen by a statistician.
