Reviewer's report

Title: High Prevalence of Overweight and Obesity Among a Representative Sample of Puerto Rican Children

Version: 2  Date: 13 November 2014

Reviewer: Magda Antal

Reviewer's report:

Major Compulsory Revisions
None

Minor Essential Revisions
1, Line161-162: the overall figures after obesity and overwieght do not match the ones in Table 1.

Discretionary Revisions
None

It should be noted that the BMI does not give information on visceral obesity. A simple and costless method is measuring the waist circumference. In the future the authors should include such data in their studies.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
