Reviewer’s report

Title: The effect of isoniazid preventive therapy on incidence of tuberculosis among HIV-infected clients under pre-ART Care, Jimma, Ethiopia: a retrospective cohort study

Version: 4 Date: 23 February 2015

Reviewer: Valeria Saraceni

Reviewer’s report:

Minor Essential Revisions:
P.11 - the 2nd paragraph starts with the same sentence that is the first paragraph under Predictors of tuberculosis incidence.
This very section would benefit of a concise description of the findings in the multivariate analysis.

Conclusions and recommendation:
The authors could summarize their main conclusions without repeating their findings here.

Tables:
I see no need for the inclusion of Tables 5 and 6.

Figure 2 doesn't belong to the main paper.

Level of interest: An article of limited interest

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
I declare that I have no competing interests.
