Reviewer's report

Title: Food insecurity is a barrier to prevention of mother-to-child HIV transmission services in Zimbabwe: A cross-sectional study

Version: 1 Date: 8 March 2015

Reviewer: Adamson Muula

Reviewer's report:

Thank you for giving me this opportunity to review the manuscript. I have reviewed the manuscript and I have the following observations to make:

1. The manuscript is well written in terms of grammar and flow of thought;
2. While there is reported the sampling strategy, I would like to read also what are the implications of this strategy to the inferences made;
3. Do the authors think that socio-economic position may affect access to services through pathway such that low status women are not given the quality of services given to those of higher status and so subsequently affecting future uptake?

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
