Reviewer’s report

Title: The association between sedentary behaviour and risk of anxiety: A Systematic Review

Version: 3 Date: 1 May 2015

Reviewer: Karin Proper

Reviewer’s report:

I strongly compliment the authors for their substantial changes addressing my major concerns. The current version meets the issues raised, including the synthesis to draw conclusions, exclusion of intervention study, and they even contacted the authors of the studies identified. I have no further suggestions to improve the manuscript.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
