Reviewer's report

Title: Using New Technologies to Promote Weight Management: A Randomised Controlled Trial Study Protocol

Version: 2  Date: 1 April 2015

Reviewer: Pao-Hwa Lin

Reviewer's report:

The authors have revised the manuscript well with the exception of a couple of minor essential revisions:

1. There are still minor grammatical errors. For example, line 191, "the" before using is unnecessary, line 193, a "study" may be missing before will.

2. It's clear from the design that the aim of the study also included examination of the effect of the intervention in sustaining weight loss. However, this is not mentioned in the paragraph under "Aims of this study". Only weigh loss was mentioned. It may also be helpful for the authors to link the aims to the hypotheses better.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.

Declaration of competing interests:
