Reviewer's report

Title: Caste-based social inequalities and childhood anemia in India: Results from the National Family Health Survey (NFHS) 2005-2006

Version: 3
Date: 12 March 2015

Reviewer: Abhishek Kumar

Reviewer's report:

I see the strength of the manuscript as it describes the association of caste with childhood anemia in India. These changes are making this manuscript suitable for publication. However, corresponding authors must be one who conceived the entire idea and designed the research topic, not someone who has least contribution in the manuscript. Authors must clarify this with editors before manuscript is formally accepted.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
