Title: How active are people in metropolitan parks? An observational study of park visitation in Australia

Version: 2 Date: 30 May 2015

Reviewer: Jason Bocarro

Reviewer's report:

The authors did attempt to address all the points outlined. However, we have a philosophical difference of opinion. I'm still not convinced that as it stands, this article is worthy of publication due to the lack of contribution it makes to existing research in this area. However, the authors seem to feel that the baseline data, collected in parks in Australia, make a worthy contribution.
