Reviewer's report

Title: Social representations of male circumcision as prophylaxis against HIV/AIDS in Zimbabwe

Version: 3 Date: 12 June 2015

Reviewer: Rebecca Fielding-Miller

Reviewer’s report:

Minor Essential Revisions
1) Please define the VMMC acronym before it is used in the introduction (lines 27-28)
2) Line 160, "conveniently sampled" should read "convenience sampled / convenience sampling"
3) Reporting of FGD participant characteristics are not consistent. Some say simply "female/male FGD," while others report age range or FGD type. Either is fine, as long as it is consistent.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
