Reviewer’s report

Title: Development of a Canadian Socioeconomic Status Index for Environmental Health

Version: 3 Date: 26 June 2015

Reviewer: Anne Peasey

Reviewer’s report:

The authors have satisfactorily addressed my comments. The only remaining comment relates to lines 308-311, where I would suggest the text is reword slightly:

"A limitation of working with indices based on Census data in Canada is the lower number of variables collected in the most recent Census.[31] It is also assumed that SES will be stable over time, serving as a proxy in population based studies using data from other years."

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
