Reviewer's report

Title: Self-perceived psychological stress is associated with parameters of adiposity and subclinical atherosclerosis disease in Mexican population. The GEA Study.

Version: 1 Date: 1 November 2014

Reviewer: Angelo Compare

Reviewer's report:

DISCRETIONARY REVISIONS:
1. To add sample information (Mean age, DS) in "abstract" and "subjects" sections.
2. To add prevalence data of obesity in "Introduction" section.

MINOR ESSENTIAL REVISIONS:
3. I suggest to indicate as a limitation the lack of a standardized questionnaire to assess self-subjective stress.
4. I suggest to review the following articles, in order to extend the "discussion" section:

No major compulsory revisions are required.

Level of interest: An article of importance in its field
Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests: I declare that I have no competing interests
