Reviewer's report

Title: Country Characteristics and Acute Diarrhea in Children from Developing Nations: A Multilevel Study

Version: 4  Date: 28 February 2015

Reviewer: Niko Speybroeck

Reviewer's report:

I would indeed suggest, explaining the search strategy (in even slightly more detail) so that readers can understand and repeat it.

I also noted following note that I do not fully understand: “WHAT? DID YOU ADDRESS HIS COMMENT THERE? IF SO, SAY IT”. I also did not find the interaction issue addressed on the pages and line numbers indicated by the authors….

Although the revision was not fully professional, some minor corrections may now bring it to an acceptable level.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, and I have assessed the statistics in my report.

Declaration of competing interests:
