Reviewer's report

Title: The associations between intimate partner violence, childcare practices, and infant health: Findings from Demographic and Health Surveys in Bolivia, Colombia and Peru

Version: 3 Date: 30 July 2015

Reviewer: MMH Khan

Reviewer's report:

Although authors remarkably improved the manuscript by modifying it based on my last comments, still I have found several mistakes. Particularly, they mismatched the texts and tables. Although they presented results of logistic regression analyses in Table 5, they mentioned that these results are presented in table 2. It is surprising that authors were not careful during revision. Somehow, the text based on bivariable analysis is too long (almost three pages), which should be reduced. There are also some minor mistakes that should be thoroughly corrected.

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, and I have assessed the statistics in my report.
