Reviewer's report

Title: Early Motherhood: A Qualitative Study Exploring the Experiences of African Australian Teenage Mothers in Greater Melbourne, Australia

Version: 6 Date: 18 August 2015

Reviewer: Lesley Hoggart

Reviewer's report:

This is a much improved paper with the authors having responded positively to both reviewers suggestions. I have a suggestion for a discretionary revision only: the Discussion is rather long, and repetitive in places, and could be tightened up.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
