Title:Socioeconomic position and work, travel, and recreation-related physical activity in Japanese adults: a cross-sectional study

Version:4 Date:13 July 2015

Reviewer:Heini Wennman

Reviewer’s report:

Thank you for your last revision. I only have three last minor revisions for the authors to consider:

1. In the abstract, please correct the last sentence: women working full-time have significantly lower and not higher travel related physical activity.
2. In the abstract it says that there were 3264 participants but in the methods it has been said that there were 3269 participants. Please revise this discrepancy.
3. Line 73: please correct > to <3million
