Reviewer's report

Title: Did HealthKick, a randomised controlled trial primary school nutrition intervention improve dietary quality of children in low-income settings in South Africa?

Version: 5  Date: 6 September 2015

Reviewer: Charlotte Evans

Reviewer's report:

The manuscript is much improved having addressed the revisions by the reviewers. There was one comment that still needs clarification in the text and that is the first comment by reviewer 1 on the analysis at school level. Although clarification was provided in the comments in the cover letter it has not been added to the manuscript so this is still not clear enough for the reader. Please make it clear that the intervention is provided at the school level. It is important.

Level of interest: An article of outstanding merit and interest in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
