Reviewer's report

**Title:** Do everyday problems of people with chronic illness interfere with their disease management?

**Version:** 2  **Date:** 13 July 2015

**Reviewer:** Carolyn Ehrlich

**Reviewer's report:**

Thank you for the opportunity to review this manuscript which adds an important perspective to the issues of self-managing with a chronic illness. The only revision that I would suggest to the authors, and which is discretionary, is to consider adding information about the number of respondents who identified that they experienced more than one of either basic problems and social problems.

**Level of interest:** An article of importance in its field

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**

I declare that I have no competing interests
