Reviewer's report

Title: Understanding the complex determinants of height and adiposity in disadvantaged daycare preschoolers in Salvador, NE Brazil through structural equation modelling

Version: 2 Date: 12 October 2015

Reviewer: Stephanie Schoeppe

Reviewer's report:

The authors have done a good job in addressing the comments by the first reviewer (Dr Stein). The reviewer had raised some major concerns. However, the authors made a thorough effort in clarifying the questions raised, rerunning analyses and revising the manuscript accordingly. I therefore recommend the acceptance of this manuscript.
