Reviewer’s report

Title: Psychosocial job conditions, fear avoidance beliefs and expected return to work following acute coronary syndrome: a cross-sectional study of fear avoidance as a potential mediator

Version: 3 Date: 23 November 2015

Reviewer: Torill Helene Tveito

Reviewer’s report:

Minor essential revisions

Most of my concerns are well taken care of in the revised manuscript. However, I still have 2 comments:

1. Please include the information about measurement of pre-morbid work ability in the manuscript.

2. I understand the argument of the authors for keeping Table 5 and information on the non-responders in the Discussion section. However, I am still of the opinion that it belongs in the Results section.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
