Reviewer’s report

Title: Epidemiology of non-fatal injuries among Egyptian children: a community-based cross-sectional survey

Version: 3 Date: 27 October 2015

Reviewer: Angela Watson

Reviewer’s report:

This paper is an important contribution to the literature. The authors have made substantial changes in light of the review and the paper now reads very well.

Major Compulsory Revisions
None

Minor Essential Revisions
Need to make the number of decimal places for p values consistent throughout tables etc. I would suggest 3 decimal places (if greater replace with < .001 - please note this is only a suggestion as long as it is consistent.

Figures need to be labeled with axes titles and figure titles

Discretionary Revisions
The authors may want to consider discussing the age grouping as a limitation.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
