Reviewer’s report

Title: A systematic review of correlates of sedentary behaviour in adults aged 18-65 years: a socio-ecological approach

Version: 0 Date: 08 Sep 2015

Reviewer: Han Cg Kemper

Reviewer’s report:

The paper is very long and the results about the relation between sitting behavior and physical health are extremely diverse.

Reading although well written is difficult because the more than 50 studies are also diverse. Most of them are cross sectional and only three are longitudinal and only one is experimental. Suggestion try to conclude about these three types of designs.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

No

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
