Title: Patterns of HIV Testing Practices among Young Gay and Bisexual Men Living in Scotland: A Qualitative Study

Version: 1 Date: 25 Apr 2017

Reviewer: T Charles Witzel

Reviewer’s report:

I'm very happy with the changes made to this manuscript. I think that it is significantly strengthened and will make a very useful contribution to an under explored topic within HIV prevention.

My only comment (which is discretionary) is that I feel the sentence running from line 431 to 435 is a bit confusing and perhaps runs on a bit. If the author and the editor agree, it might be cleaved in two or rephrased to clarify sense.

Thank you for the opportunity to review this important work.
