Reviewer’s report

Title: Digital Media-based Health Intervention on the Promotion of Women's Physical Activity: A Quasi-Experimental Study

Version: 2 Date: 21 Oct 2017

Reviewer: Serge Brand

Reviewer's report:

Again, the authors did a nice job, however, I would like to draw their attention to the statistics: First, given that you test your intervention with an ANOVA, it is not necessary to report the single t-tests anymore, that is, Table 3 is not necessary. Second, mention the ANOVA both in the Abstract and in the Section "Statistical analysis". Next, as regards the figures, I suggest to giving a closer look to Rahimi et al 2016 (https://www.ncbi.nlm.nih.gov/pubmed/27382293); axes are missing and also their labelings.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
