**Reviewer’s report**

**Title:** Reducing GHG emissions while improving diet quality: exploring the potential of reduced meat, cheese and alcoholic and soft drinks consumption at specific moments during the day

**Version:** 1  **Date:** 22 Aug 2017

**Reviewer:** Rebecca McLaren

**Reviewer's report:**

I appreciate the additions recognizing that the changes in diet decrease calories and micronutrients and that some people may need different strategies to meet their nutritional needs, adding household income, specifying GHGe instead of broader environmental impacts, and clarifying the LCA.

I still think there could be more discussion of the magnitude of these dietary changes and the difficulty of behavior change and that the changes recommended may be difficult to achieve but the paper does mention it.

**Are the methods appropriate and well described?**
If not, please specify what is required in your comments to the authors.

Yes

**Does the work include the necessary controls?**
If not, please specify which controls are required in your comments to the authors.

Yes

**Are the conclusions drawn adequately supported by the data shown?**
If not, please explain in your comments to the authors.

Yes

**Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?**
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I recommend additional statistical review
