Reviewer’s report

Title: Healthy shopper? Blood pressure testing in a shopping centre Pop-Up in England

Version: 0 Date: 07 Aug 2018

Reviewer: Jun Ma

Reviewer’s report:

Comments:

1. How the unhealthy retail outlet score was calculated to measure for the unhealthiness of the shopping center? Is there any other researchers have used it before?

Please listed the details of the method of score in supplementary materials.

2. Pop up provided checks for elevated intraocular eye pressure and blood pressure, why not report the two results in one paper?

3. Suggest to delete "Healthy shopper" in the title, since only blood pressure of the participants were presented in the article, which is not enough to conclude the participants (shoppers) is healthy.

4. Line 15-16, Is there a typo error?

"……≥140/90 mmHg." Should be "……≤140/90mmHg"?

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

No

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

No

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Unable to assess
Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
