Reviewer’s report

Title: Coverage of Vitamin A Supplementation in Nigeria and Implications for Childhood Blindness

Version: 0 Date: 09 Aug 2018

Reviewer: Silvia Martini

Reviewer's report:

Well-written paper on an interesting topic. Although the evaluation performed is limited to a very specific setting (ie, Nigeria), I assume that the information provided can be relevant also to other African low-income countries.

Methods are on the whole appropriate, and the few limitations have been correctly identified and acknowledged. Statistics, including multivariate analyses, seem adequate. The results have been thoroughly discussed, and support the conclusion drawn. References are updated.

I just suggest to better clarify this point: "low coverage among children in this age group may be because of the child may not have attained the age of 6 months at the time of the VAS but became of age during the survey".

Are the methods appropriate and well described?  
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?  
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?  
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?  
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
