Title: Feasibility of a Behavioral Automaticity Intervention Among African Americans at Risk for Metabolic Syndrome

Version: 1 Date: 29 Oct 2018

Reviewer: Cynthia Fritschi

Reviewer’s report:

The manuscript has been much improved and the authors addressed all initial comments and concerns. I have one minor concern that I believe is an "easy fix". There still remain some figures that do not have a key and/or title with the figure. The figures should be able to be self-explanatory, without having to go back through the text to comprehend them. Figure 4 reflects associations between diet and PA adherence and automaticity-are the axes reflecting weeks and scores? These are minor changes, but may help with readability.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.
