Reviewer’s report

Title: SKIP (Supporting Kids with diabetes In Physical activity): Feasibility of a randomised controlled trial of a digital intervention for 9-12 year olds with type 1 diabetes mellitus.

Version: 0 Date: 10 Dec 2018

Reviewer: Peter Memiah

Reviewer’s report:

Well structured descriptive paper - showing mean changes. Excellent articulation of the study.

A few things to note- on the tables CSAPPA Adequacy score shows a pvalue of 1?

CPHQ Physical score baseline to 8 week follow up was the only significant variable- what was it about this test? in the discussion- provide a sentence of other studies that have utilized the same assessment

The attrition of 49 at baseline to 38-even though this is better than most studies - is such across the health facility system?- you mention it as a limitation- can you provide further information on the facilities .

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics

Quality of written English
