**Title:** Impact of disease screening on awareness and management of hypertension and diabetes between 2011 and 2015: results from the China Health and Retirement Longitudinal Study

**Version:** 1  **Date:** 13 Dec 2018

**Reviewer:** Fiona Bragg

Reviewer's report:

Thank you for the opportunity to review the revised version of the manuscript "Impact of disease screening on awareness and management of hypertension and diabetes among middle-aged and older Chinese: a four-year prospective study" (Manuscript number PUBH-D-18-02354R1).

The authors have adequately addressed my previous comments and the revised manuscript should be accepted for publication. However, there are a couple of places where the text no longer seems to be entirely accurate and slight modification would be beneficial prior to publication. In particular, since the additional information provided by the authors suggest it is unclear that the blood test results were mailed to participants, the following two statements should ideally be modified:

Page 6 lines 1-2: "Blood test results were mailed to participants three weeks after specimen collection"

Page 14 lines 11-12: "although participants were informed of their blood pressure immediately during the interview but received blood reports later"

**Are the methods appropriate and well described?**
If not, please specify what is required in your comments to the authors.

Yes

**Does the work include the necessary controls?**
If not, please specify which controls are required in your comments to the authors.

Yes

**Are the conclusions drawn adequately supported by the data shown?**
If not, please explain in your comments to the authors.

Yes
Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
