Reviewer’s report

Title: Perspectives on contraceptive implant use in women living with HIV in Cape Town, South Africa: a qualitative study among primary healthcare providers and stakeholders

Version: 1 Date: 23 Jun 2019

Reviewer: Bola Solanke

Reviewer’s report:

The study explored the impact of official guidance on contraceptive implant use among women living with HIV in Cape Town. The study has important implication for public health by strengthening the debate on the desirability of implant use in the context of efavirenz-based ART. The methodology adopted was sufficient to achieve the aim of the study. However, the background should have a clearly stated objective. Though, this was implied by the gap the study intends to fill.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
