Reviewer’s report

Title: Screen time among Spanish university students with disabilities: a Self-Organizing Maps Analysis

Version: 0 Date: 02 May 2019

Reviewer: Dorota Groffik

Reviewer's report:

Congratulations to the authors of the article.

There are few articles about the relationship between physical activity and screen time of people with disabilities. This article deserves even more attention to the fact that the authors made screen time analysis among students with various disabilities, taking into account other variables such as interests, gender, BMI, physical activity and sociodemographic variables. In addition, the authors used the Self-Organizing Maps (SOM) analysis for the first time to evaluate variable dependencies.

Knowledge and results presented at work can contribute to the development of future intervention programs among people with disabilities.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
Quality of written English
