Title: Descriptive epidemiology of cholera outbreak in Nigeria, January-November, 2018: Implications for the Global Roadmap Strategy

Version: 1 Date: 12 Aug 2019

Reviewer: Tawatchai Apidechkul

Reviewer's report:

1. In section of "Method", I think you should put a topic of "Data collection procedure" and tell detail research tools used, and how did you developed before sued, and how did you collect and manage your data before analysis.

2. In table 1, I do not think the definition of Epidemiological wave is correct? Any end of a wave should be defined as " no more new cases reported during two incubation periods from the last case report in a particular setting of outbreak. Please make sure you are putting a correct definition of epidemic wave, and re-think in whole content. It also should be reflected the information from figure no.1.
